Career Objective

Aspiring full-stack developer with a strong foundation in AngularJS for frontend development and a working knowledge of .NET for backend solutions. Passionate about building efficient, scalable, and user-friendly web applications, seeking an opportunity to enhance my skills and contribute to impactful projects in a dynamic environment..

Education

Guru Nanak Institutions Technical Campus, B.Tech in Computer Science Engineering Sept 2019 – Aug 2023

- GPA: 7.79/10

Sri Chaitanya Jr. Kalasala, Intermediate in MPC June 2017 – June 2019

- GPA: 9.0/10

Bhoopathi High School May 2017

- GPA: 9.2/10

Experience

Software Engineer, CINCYN TECH – Begumpet, Hyderabad Dec 2024 – Current

- Developed and maintained the ADMIN page and UI pages of HIVEPROP (HiveProp.com).
- Designed and implemented workflows for rental and PG/Coliving in the real estate platform.
- Assisted in database design to improve efficiency and scalability.
- Integrated RESTful APIs (GET, POST, EDIT, DELETE) for seamless data communication.
- Worked on payment gateway integration to facilitate secure transactions.
- Implemented authentication and authorization for the ADMIN page, ensuring secure access.
- Provided role-based authentication using AuthGuard and Role Guards to restrict access based on user roles.
- Implemented AI integrations to enhance platform capabilities.

Projects

Real Estate Property Listing UI

- Designed a real estate property listing page using Angular & SCSS.
- Fetched property data from a mock API and displayed it dynamically.
- Created a search & filter functionality for location, price, and property type.

Enterprise Dashboard

(<https://mohammadjunaidahmed-dev.github.io/enterprise-dashboard/>)

- Developed a full-stack enterprise dashboard application to visualize and manage business data efficiently.
- Built the frontend using Angular and SCSS, featuring interactive charts, tables, and responsive layouts for a seamless user experience.
- Designed and implemented a RESTful backend API with .NetCore 8.0, providing secure endpoints for data management.
- Integrated a MSSQL database for robust data storage and retrieval.
- Implemented JWT-based authentication and role-based access control to ensure secure user login and data protection.
- Deployed the backend API on Azure and the frontend on GitHub Page, enabling public access to the application.

Technologies

Languages: C#, SQL, TypeScript

Technologies: .NET, Microsoft SQL Server, AngularJS, React
